Mathematics Paper 1 - KCSE 2024 Past Papers Questions and Answers

Questions

1. **Section I**

   Answer all the questions in this section in the spaces provided.

   Without using mathematical tables or a calculator, evaluate: giving the answer in decimal form. (3 marks)

   0.13 x 0.3 - 0.003

   0.09

2. Simplify the expression: (3 marks)

   $4x^2 - 9$

   $2x^2 + x - 6$

3. A straight line L_1 whose equation is $y = 2 - \frac{1}{3}x$ meets the y – axis at Q. Another straight line L_2 is perpendicular to L_1 at Q. Find the equation of L_2 in the form $y = mx + c$ where m and c are constants. (3 marks)

4. A circle of radius 3 cm passes through all the vertices of a regular hexagon. Determine the area of the circle that lies outside the hexagon. (3 marks)

5. Solve for x in the equation $25^x = 125^{\frac{2}{3}} \div 5^{-1}$. (3 marks)

This is a sample exam.
